

FOLATE

facts

and YOUR health

New Legislation

As of 13th September 2009 it is mandatory that folic acid be added to bread-making flour during the milling process at the ratio of 2-3mg to 1kg of flour.

You do have an option...

GO Natural, Avoid Additives

NO ARTIFICIAL ADDITIVES:

The best organic grains available are sourced from farms throughout the heart of Australia's prime hard grain belt, in order to meet the rigorous standards of the organic certification. 100% stone-ground Organic Flours milled from grains that are grown, stored and milled without the use of any chemicals.

SOURCE OF NATURAL FOLATE with NO ARTIFICIAL ADDITIVES

The addition of Folic Acid to flour is just putting in an artificial B group vitamin that was present naturally but has been removed through over-processing of the natural whole grain.

FILTERED WATER

WATER

FLUORIDATION!

Continuing our belief in all things natural, and in the best interest of our customer's ongoing good health, we will be filtering all water used in our bakery products to minimise additives such as Fluoride which is to be added to our local water supply.
